

BIG STYLE ON A SMALLER SCALE

VINYL SIDING HAS GOOD LOOKS THAT LAST.

Cape Cod houses were built to withstand harsh New England winters in a compact design. But that doesn't mean they can't be big on style. Especially when clad in today's vinyl siding, architectural trim and accessories. Vinyl and other polymeric siding offer a diverse selection that includes the authentic look of weathered shakes and shingles. Plus accents like beaded soffit.

And they all maintain that original diehard spirit with their rugged durability. Which is still welcome in Cape Cod. Or anywhere.
